Technical Skills

Languages: Javascript, Typescript, NodeJs, Golang (beginner), Electron (Familiar)

Frontend: ReactJS, NextJs, Vite (Shadcn, Tailwind CSS), (Familiar with MaterialUi, Bootstrap, AntD)

Backend: ExpressJs, NestJs (MicroServices + Mono Repo), Redis, RabbitMQ, BullMQ, BunJs (Hono), WebSocket, Docker

Database: MySQL, PostgreSQL, Mongo DB,

Learning: Rust, Kubernetes, DSA, Design Patterns, LangchainJs, Hugging Face, Rsbuild

Tool-Technologies: Git, VS Code, Webpack, cPanel Vercel Render Netlify AWS Strapi Nx-MonoRepo, FastifyJs

Experience

CozinCo Innovations

Aug 2023 – Dec 2024

Full Stack Developer

Delhi, (Remote)

- Leading the Development for the startup brand SaveIt, ensuring a seamless, scalable Restful API with microservices
- Monitored app performance and implemented performance tuning and optimization strategies to ensure scalability like caching, reduced api calls
- Managed projects from planning to deployment, ensuring milestones, system designs, timelines, and priorities were met
- Collaborated with cross-functional teams and UX/UI designers, to align development efforts with goals and user requirements.
- Conducted the code reviews and share feedback to improve code quality, also contributed to the improvement.

Saveit India Pvt. Ltd

Jan 2023 – July 2023

Junior Web Developer Intern

Delhi, (Remote)

- Assisted in development, Bug Fixing, Documentation and Support
- Quickly learned to new tools and frameworks, gaining hands-on experience in web development technologies and improving technical skills throughout the internship.

Projects

SaveIt | *NodeJS, Typescript, NestJS (MonoRepo, Microservices), PostgreSQL, BullMQ, Redis, WebSocket*

- Fintech Platform which deals with buying Gift Card, Credit Card, Loans etc
- Led the development of SaveIt, Api Design, Database Design, Mono-Repo arch, ensuring scalable and maintainable code
- WebSocket for real-time notifications, BullMQ and Redis for efficient background job processing of orders.
- Implemented API on Admin Dashboard for SaveIt, utilizing React.js 18 and coordinates with Frontend Dev, Code Review

Bottle Recycle Management System | *ReactJs, Redux, ExpressJS (Typescript), Typeorm, PgSQL, Socket.io*

- A System which maintain the data of recycles the empty bottles and user get paid for each bottle
- Developed features for user/driver registration, Gps location, bottle tracking, payment processing, recycling metrics and Admin Dashboard
- Built a robust backend using ExpressJS with TypeScript for enhanced code quality and maintainability
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.

Synchronous Server | *ElectronJs, ReactJs, Vite, ExpressJS (Typescript), Redis (Pub-Sub), Socket.io*

- Desktop App that connects a Tally on host machine with a backend hosted on VPS to sync data between the DB and Tally Data of client
- Implemented efficient data exchange and real-time updates, improving system reliability and performance

Education

Government College

Aug. 2017 – Oct. 2020

Bachelor of Science (Non-Medical)

Bhiwani, Haryana

Achievements / Extracurricular

- Secured 2nd Position in Science Exhibition at College Level.
- 1 Year Experience of Theater Artist, performed in two professional shows, received an award
